

The B&B Mega Block offers a safe and tested platform when setting and storing pipe. On many job-sites the pipe would either set directly on the ground, or be wedged between two pieces of wood to restrict rotation. The Mega Block accomplishes the same function, but in a safe, engineered and 3rd party tested product. Each Mega Block has fork lift slots and two lifting eyes for easy movement.

84" Pipe Capacity!

Specifications

- Solid steel construction allows for heavy-duty job-site use
- Fork lift and eye-bolts allow easy lifting and movement
- Great way to safely store, fabricate, or stage pipe
- 20,000 lbs. weight capacity
- 2" - 84" pipe diameter capacity
- 2" - 48" pipe diameter capacity (junior)

**Mega Block Junior
48" Pipe Capacity!**
